

Solidification Course 2020

For the first time including a lecture on Additive Manufacturing with special emphasis on Rapid Solidification and associated defects

Announcement

29th Edition

973 participants from 355 companies from 38 countries so far!

Les Diablerets (Switzerland)

May 10 – May 15, 2020

THE LECTURERS

Courses, discussions and exercises will be presented by the following lecturers:

<i>Prof. Christoph Beckermann</i>	Professor, University of Iowa, Iowa City, USA
<i>Prof. Hervé Combeau</i>	Professor, Lorraine University, Institut Jean Lamour, Nancy, France
<i>Prof. Jon Dantzig</i>	Professor Emeritus, University of Illinois, Urbana, USA
<i>Dr Marco Gremaud</i>	EMEA Executive Managing Director, ESI Group, Lausanne, Switzerland
<i>Prof. Matthew John M. Krane</i>	Professor, Purdue University, USA
<i>Prof. Andreas Ludwig</i>	Professor, Montanuniversitaet Leoben, Austria
<i>Prof. André Phillion</i>	Associate Professor, McMaster University, Hamilton, ON, Canada
<i>Prof. Michel Rappaz</i>	Professor Emeritus, Ecole Polytechnique Fédérale de Lausanne (EPFL), Switzerland

SCOPE OF THE COURSE

For the twenty-ninth consecutive year, Calcom ESI, in collaboration with the Swiss Federal Institute of Technology of Lausanne (EPFL), is organizing a solidification course with the participation of renowned lecturers from Swiss, French, Austrian, Canadian and US universities.

This one-week course held in English is designed for engineers and scientists from industry and research centers who wish to improve their knowledge in the field of solidification. Participants should have a degree in materials science, metallurgy, mechanical engineering, chemical engineering, physics or chemistry.

Although the theoretical background of solidification is reviewed, the course is oriented towards the relation of solidification theories to industrial practice. Application of these concepts are made to processes including additive manufacturing, shape casting, continuous casting, and directional solidification in a variety of metallic systems.

The fundamental aspects of solidification (e.g., phase diagrams, heat and mass transfer) are addressed together with the formation of microstructures (e.g., grain structures, dendrites, eutectics) and defects (e.g., porosity, hot tearing, micro- and macro-segregation). Connection between macroscopic and microscopic aspects, such as the prediction of these microstructures and defects as a function of process parameters, is emphasized. For the first time in 2020, a new course covering various aspects of additive manufacturing, including rapid solidification theory, will be presented.

In addition to the lectures, group exercises, discussions, and films are organized in order to apply, practice, and visualize the course content. The interaction between the limited number of participants (maximum 40) and the eight lecturers has proven in the past to allow an optimum transfer of knowledge during the whole week, both in and out of the sessions. To continue this tradition, private or group discussions can take place during social hours, evenings, and Wednesday afternoon in order to treat more specific problems which the participants may encounter.

The course follows very closely the content of the book "Solidification" by J.A. Dantzig and M. Rappaz.

PROGRAMME

Sunday May 10, 2020

From 18:30 Welcome of the participants, registration
19.15 Dinner

Monday May 11, 2020

08.30 - 09.45 Introduction / Overview of solidification phenomena M. Gremaud
09.45 - 10.15 Break
10.15 - 11.15 Phase diagrams J. Dantzig
11.15 - 12.15 Discussion/Exercises (Phase diagrams) C. Beckermann / J. Dantzig
12.30 Lunch
13.45 - 14.45 Heat and Mass transfer M. Krane
14.45 - 15.45 Discussion/Exercises (Heat-Mass transfer) H. Combeau / M. Krane
15.45 - 16.15 Break
16.15 - 17.15 Nucleation and grain refinement in alloys A. Ludwig
17.15 - 18.00 In-situ visualization of solidification (films) M. Rappaz
18.30 Social Hour
19.30 Dinner

Tuesday May 12, 2020

08.30 - 09.30 Microsegregation C. Beckermann
09.30 - 10.30 Discussion/Exercises (Microsegregation) A. Ludwig / C. Beckermann
10.30 - 11.00 Break
11.00 - 12.00 Dendritic structures J. Dantzig
12:15 Lunch
14.00 - 15.00 Eutectic solidification A. Ludwig
15.00 - 16.15 Discussion/Exercises (Dendrites-Eutectic) J. Dantzig / A. Ludwig
16.15 - 16.45 Break
16.45 - 17.45 Mushy zone modeling H. Combeau
18.30 "Swiss Evening" dinner

Wednesday May 13, 2020

08.30 - 09.30	Porosity	C. Beckermann
09.30 - 10.30	Discussion/Exercises (Porosity)	H. Combeau / C. Beckermann
10.30 - 11.00	Break	
11.00 - 12.00	Modeling of columnar and equiaxed solidification	H. Combeau
12.15	Lunch	
	Free time (free discussions with the professors)	
18.15	Social hour	
19.15	Dinner	

Thursday May 14, 2020

08.30 - 09.30	Hot tearing	A. Phillion
09.30 - 10.45	Discussion/Exercises (Hot tearing)	M. Krane / A. Phillion
10.45 - 11.15	Break	
11.15 - 12.15	Additive manufacturing: rapid solidification	M. Rappaz
12.30	Lunch	
14.15 - 15.15	Macrosegregation	M. Krane
15.15 - 16.30	Discussion/Exercises (Macrosegregation)	A. Ludwig / M. Krane
16.30 - 17.00	Break	
17.00 - 18.00	Answer to participant questions – Panel session	All
18.15	Social hour	
19.15	Dinner	

Friday May 15, 2020

08.30 - 09.30	Solidification path in multi-component systems	M. Rappaz
09.30 - 10.30	Discussion/Exercises (Multi-comp)	J. Dantzig / M. Rappaz
10.30 - 11.00	Break	
11.00 - 11.45	Synthesis – Linking solidification phenomena	A. Phillion
11.45	Concluding remarks	M. Gremaud
12.00	End	
12.15	Lunch	

PRACTICAL INFORMATION

Dates: from Sunday May 10, 2020 evening
to Friday May 15, 2020, mid-day (lunch included)

Location: Hotel "Eurotel Victoria", Les Diablerets, Switzerland
(Mountain resort in the Swiss Alps, 100 km from Geneva)
www.eurotel-victoria.ch/diablerets

Access: Train or car (2.5 hours by train from Geneva Airport and
4.5 hours by train from Zurich Airport).

Online Registration:
<https://www.esi-group.com/company/events/2020/solidification-course-2020>

Registration is limited to 40 participants.
All registrations will be confirmed in writing within 2-3 weeks.

Price: EUR 4'490.- (EUR = Euro currency)
This price includes the registration fee, the booklet of the course
with the lecture notes, the book "Solidification", the hotel (full
board), drinks during the meals, social hours and coffee breaks.

The course fee should be paid before April 10, 2020.

A confirmed registration corresponds to a firm commitment. This means that the course fee should be paid in any case, unless the registration is cancelled in writing at least 45 days prior to the start of the course.

Address for
payment: Banque Cantonale Vaudoise (BCV)
Case postale 300
CH-1001 Lausanne, Switzerland
SWIFT code: BCVLCH2L
Clearing number: 767
Calcom ESI account: CO E 5001.77.74
IBAN: CH12 0076 7000 E500 1777 4
To the order of CALCOM ESI

An information package with the practical details will be sent in advance (around middle of April 2020) to each registered participant.

Previous courses were attended by participants from the following companies or institutions:

Argentina INTI **Australia** BHP, Comalco, Uni Wollongong **Austria** AMAG, ARC, Böhler, Buntmetall Amstetten, Eisenwerk Sulzau Werfen, Giesserei Institut, Hertwich Eng., Leoben University, LKR, Mubea Wheels, Siemens, Voest-Alpine, TU Graz
Belgium Allard Europe, Bekaert, Consolidated Precision Products, CRIF, Heraeus Electro-Nite Intl., KU Leuven, Magotteaux, Union Minière **Brazil** Electro Aço Altona, Gerdau, ITP, Villares Metals **Canada** Alcan, Aluminium Tech. Carlton Univ., Magotteaux, Univ. of McMaster, Univ. of Windsor, Univ. of Western Ontario **Czech Rep.** Mecas, Vitkovicg Heavy Machinery, Technical Univ.
