

Solidification Course 2019

Announcement

28th Edition

941 participants from 341 companies from 38 countries so far!

Villars sur Ollon (Switzerland)

May 12 – May 17, 2019

THE LECTURERS

Courses, discussions and exercises will be presented by the following lecturers:

<i>Prof. Christoph Beckermann</i>	Professor, University of Iowa, Iowa City, USA
<i>Prof. Hervé Combeau</i>	Professor, Lorraine University, Institut Jean Lamour, Nancy, France
<i>Prof. Jon Dantzig</i>	Professor Emeritus, University of Illinois, Urbana, USA
<i>Dr Marco Gremaud</i>	EMEA Executive Managing Director, ESI Group, Lausanne, Switzerland
<i>Prof. Matthew John M. Krane</i>	Professor, Purdue University, USA
<i>Prof. Andreas Ludwig</i>	Professor, Montanuniversitaet Leoben, Austria
<i>Prof. André Phillion</i>	Associate Professor, McMaster University, Hamilton, ON, Canada
<i>Prof. Michel Rappaz</i>	Professor Emeritus, Ecole Polytechnique Fédérale de Lausanne (EPFL), Switzerland

SCOPE OF THE COURSE

For the twenty-eighth consecutive year, Calcom ESI, in collaboration with the Swiss Federal Institute of Technology of Lausanne (EPFL), is organizing a solidification course with the participation of renowned lecturers from Swiss, French, Austrian, Canadian and US universities.

This one-week course held in English is designed for engineers and scientists from industry and research centers who wish to improve their knowledge in the field of solidification. Participants should have a degree in materials science, metallurgy, mechanical engineering, physics or chemistry.

Although the theoretical background of solidification is reviewed, the course is oriented towards the application of solidification theories to industrial processes. The macroscopic aspects of the processes (transfer phenomena) are addressed together with the formation of microstructures and defects (microscopic phenomena). Connection between macroscopic and microscopic aspects, such as the prediction of microstructures and defects as a function of process parameters, is also emphasized. Examples of the application of these concepts to industrial processes, such as shape casting, continuous casting, additive manufacturing and directional solidification, are given.

Exercises, discussions and films are organized in order to apply, practice and visualize the content of the lectures. Due to the limited number of participants (maximum 40), interactions between the participants and the eight lecturers will allow an optimum transfer of knowledge, during the whole week, as was demonstrated during the previous editions.

Finally, private or group discussions can take place during social hours, evenings and Wednesday afternoon in order to treat more specific problems which the participants may encounter.

The course follows very closely the content of the book "Solidification" by J.A. Dantzig and M. Rappaz.

PROGRAMME

Sunday May 12, 2019

From 18:30 Welcome of the participants, registration
19.15 Dinner

Monday May 13, 2019

08.30 - 09.45 Introduction / Overview of solidification phenomena M. Gremaud
09.45 - 10.15 Break
10.15 - 11.15 Phase diagrams J. Dantzig
11.15 - 12.15 Discussion/Exercises (Phase diagrams) C. Beckermann / J. Dantzig
12.30 Lunch
13.45 - 14.45 Heat and Mass transfer C. Beckermann
14.45 - 15.45 Discussion/Exercises (Heat-Mass transfer) A. Ludwig / C. Beckermann
15.45 - 16.15 Break
16.15 - 17.15 Nucleation and grain refinement in alloys A. Ludwig
17.15 - 18.00 In-situ visualization of solidification (films) M. Rappaz
18.30 Social Hour
19.30 Dinner

Tuesday May 14, 2019

08.30 - 09.30 Microsegregation M. Krane
09.30 - 10.30 Discussion/Exercises (Microsegregation) H. Combeau / M. Krane
10.30 - 11.00 Break
11.00 - 12.00 Dendritic structures J. Dantzig
12:15 Lunch
14.00 - 15.00 Eutectic solidification A. Ludwig
15.00 - 16.15 Discussion/Exercises (Dendrites-Eutectic) J. Dantzig / A. Ludwig
16.15 - 16.45 Break
16.45 - 17.45 Mushy zone modeling H. Combeau
18.30 "Swiss Evening" dinner

Wednesday May 15, 2019

08.30 - 09.30	Porosity	C. Beckermann
09.30 - 10.30	Discussion/Exercises (Porosity)	H. Combeau / C. Beckermann
10.30 - 11.00	Break	
11.00 - 12.00	Hot tearing	A. Phillion
12.15	Lunch	
	Free time (free discussions with the professors)	
18.00	Social hour	
19.00	Dinner	

Thursday May 16, 2019

08.30 - 09.30	Thermomechanics	A. Phillion
09.30 - 10.45	Discussion/Exercises (Thermomech. - Hot tearing)	M. Krane / A. Phillion
10.45 - 11.15	Break	
11.15 - 12.15	Modeling of columnar and equiaxed solidification	H. Combeau
12.30	Lunch	
14.15 - 15.15	Solidification path in multi-component systems	M. Rappaz
15.15 - 16.30	Discussion/Exercises (Multi-comp)	J. Dantzig / M. Rappaz
16.30 - 17.00	Break	
17.00 - 18.00	Answer to participant questions – Panel session	All
18.15	Social hour	
19.15	Dinner	

Friday May 17, 2019

08.30 - 09.30	Macrosegregation	M. Krane
09.30 - 10.30	Discussion/Exercises (Macrosegregation)	A. Ludwig / M. Krane
10.30 - 11.00	Break	
11.00 - 11.45	Synthesis – Linking solidification phenomena	M. Rappaz
11.45	Concluding remarks	M. Gremaud
12.00	End	
12.15	Lunch	

PRACTICAL INFORMATION

- Dates:** from Sunday May 12, 2019 evening
to Friday May 17, 2019, mid-day (lunch included)
- Location:** Hotel "Eurotel Victoria", Villars sur Ollon, Switzerland
(Mountain resort in the Swiss Alps, 100 km from Geneva)
www.eurotel-victoria.ch/villars
- Access:** Train or car (2.5 hours by train from Geneva Airport and
4.5 hours by train from Zurich Airport).
- Online Registration:**
<https://www.esi-group.com/company/events/2019/solidification-course-2019>

Registration is limited to 40 participants.
All registrations will be confirmed in writing within 2-3 weeks.

- Price:** EUR 4'490.- (EUR = Euro currency)
This price includes the registration fee, the booklet of the course
with the lecture notes, the book "Solidification", the hotel (full
board), drinks during the meals, social hours and coffee breaks.

The course fee should be paid before April 25, 2019.

*A confirmed registration corresponds to a firm commitment. This means that
the course fee should be paid in any case, unless the registration is cancelled
in writing at least 45 days prior to the start of the course.*

- Address for
payment:** Banque Cantonale Vaudoise (BCV)
Case postale 300
CH-1001 Lausanne, Switzerland
SWIFT code: BCVLCH2L
Clearing number: 767
Calcom ESI account: CO E 5001.77.74
IBAN: CH12 0076 7000 E500 1777 4
To the order of CALCOM ESI

An information package with the practical details will be sent in advance (around
middle of April 2019) to each registered participant.

Previous courses were attended by participants from the following companies or institutions:

Argentina INTI **Australia** BHP, Comalco, Uni Wollongong **Austria** AMAG, ARC, Böhler, Buntmetall Amstetten, Eisenwerk Sulzau Werfen, Giesserei Institut, Hertwich Eng., Leoben University, LKR, Mubea Wheels, Siemens, Voest-Alpine, TU Graz **Belgium** Allard Europe, Bekaert, Consolidated Precision Products, CRIF, Heraeus Electro-Nite Intl., KU Leuven, Magotteaux, Union Minière **Brazil** Electro Aço Altona, Gerdau, ITP, Villares Metals **Canada** Alcan, Aluminium Tech. Carlton Univ., Magotteaux, Univ. of McMaster, Univ. of Windsor, Univ. of Western Ontario **Czech Rep.** Mecas, Vitkovicg Heavy Machinery, Technical Univ.
