

Solidification Course 2023

Announcement

30th Edition

<https://www.esi-group.com/company/events/2023/solidification-course-2023>

1011 participants from 368 companies from 39 countries so far!

Les Diablerets (Switzerland)

March 26 – March 31, 2023

THE LECTURERS

Courses, discussions and exercises will be presented by the following lecturers:

<i>Prof. Christoph Beckermann</i>	Professor, University of Iowa, Iowa City, USA
<i>Prof. Hervé Combeau</i>	Professor, Lorraine University, Institut Jean Lamour, Nancy, France
<i>Prof. Jon Dantzig</i>	Professor Emeritus, University of Illinois, Urbana, USA
<i>Dr Marco Gremaud</i>	Former Director of ESI Group, Manufacturing Division, Lausanne, Switzerland
<i>Dr Alain Jacot</i>	Manager, R&D – Physics & Materials, ESI Group, Switzerland
<i>Prof. Matthew John M. Krane</i>	Professor, Purdue University, USA
<i>Prof. Andreas Ludwig</i>	Professor, Montanuniversitaet Leoben, Austria
<i>Prof. André Phillion</i>	Associate Professor, McMaster University, Hamilton, ON, Canada
<i>Prof. Michel Rappaz</i>	Professor Emeritus, Ecole Polytechnique Fédérale de Lausanne (EPFL), Switzerland

SCOPE OF THE COURSE

For the thirtieth time, ESI Group, in collaboration with the Swiss Federal Institute of Technology of Lausanne (EPFL), is organizing a solidification course with the participation of renowned lecturers from Swiss, French, Austrian, Canadian and US universities.

This one-week course held in English is designed for engineers and scientists from industry and research centers who wish to improve their knowledge in the field of solidification. Participants should have a degree in materials science, metallurgy, mechanical engineering, chemical engineering, physics or chemistry.

Although the theoretical background of solidification is reviewed, the course is oriented towards the relation of solidification theories to industrial practice. Applications of these concepts are made to processes including additive manufacturing, shape casting, continuous casting, and directional solidification in a variety of metallic systems.

The fundamental aspects of solidification (e.g., phase diagrams, heat and mass transfer) are addressed together with the formation of microstructures (e.g., grain structures, dendrites, eutectics) and defects (e.g., porosity, hot tearing, micro- and macro-segregation). Connection between macroscopic and microscopic aspects, such as the prediction of these microstructures and defects as a function of process parameters, is emphasized. For the second time, a course covering various aspects of additive manufacturing, including rapid solidification theory, will be presented.

In addition to the lectures, group exercises, discussions, and films are organized in order to apply, practice, and visualize the course content. The interaction between the limited number of participants (maximum 40) and the eight lecturers has proven in the past to allow an optimum transfer of knowledge during the whole week, both in and out of the sessions. To continue this tradition, private or group discussions can take place during social hours, evenings, and Wednesday afternoon in order to treat more specific problems which the participants may encounter.

The course follows very closely the content of the book "Solidification" by J.A. Dantzig and M. Rappaz.

PROGRAMME

Sunday March 26, 2023

From 18:30 Welcome of the participants, registration
19.15 Dinner

Monday March 27, 2023

08.30 - 09.45 Introduction / Overview of solidification phenomena M. Gremaud
09.45 - 10.15 Break
10.15 - 11.15 Phase diagrams J. Dantzig
11.15 - 12.15 Discussion/Exercises (Phase diagrams) C. Beckermann / J. Dantzig
12.30 Lunch
13.45 - 14.45 Heat and Mass transfer M. Krane
14.45 - 15.45 Discussion/Exercises (Heat-Mass transfer) H. Combeau / M. Krane
15.45 - 16.15 Break
16.15 - 17.15 Nucleation and grain refinement in alloys A. Ludwig
17.15 - 18.00 In-situ visualization of solidification (films) A. Jacot
18.30 Social Hour
19.30 Dinner

Tuesday March 28, 2023

08.30 - 09.30 Microsegregation C. Beckermann
09.30 - 10.30 Discussion/Exercises (Microsegregation) A. Ludwig / C. Beckermann
10.30 - 11.00 Break
11.00 - 12.00 Dendritic structures J. Dantzig
12:15 Lunch
14.00 - 15.00 Eutectic solidification A. Ludwig
15.00 - 16.15 Discussion/Exercises (Dendrites-Eutectic) J. Dantzig / A. Ludwig
16.15 - 16.45 Break
16.45 - 17.45 Mushy zone dynamics H. Combeau
18.30 "Swiss Evening" dinner

Wednesday March 29, 2023

08.30 - 09.30	Porosity	C. Beckermann
09.30 - 10.30	Discussion/Exercises (Porosity)	H. Combeau / C. Beckermann
10.30 - 11.00	Break	
11.00 - 12.00	Columnar and equiaxed structures	H. Combeau
12.15	Lunch	
	Free time (free discussions with the professors)	
18.15	Social hour	
19.15	Dinner	

Thursday March 30, 2023

08.30 - 09.30	Hot tearing	A. Phillion
09.30 - 10.45	Discussion/Exercises (Hot tearing)	M. Krane / A. Phillion
10.45 - 11.15	Break	
11.15 - 12.15	Additive manufacturing / Rapid solidification	M. Rappaz
12.30	Lunch	
14.15 - 15.15	Macrosegregation	M. Krane
15.15 - 16.30	Discussion/Exercises (Macrosegregation)	A. Ludwig / M. Krane
16.30 - 17.00	Break	
17.00 - 18.00	Answer to participant questions – Panel session	All
18.15	Social hour	
19.15	Dinner	

Friday March 31, 2023

08.30 - 09.30	Solidification path in multi-component systems	M. Rappaz
09.30 - 10.30	Discussion/Exercises (Multi-comp)	J. Dantzig / M. Rappaz
10.30 - 11.00	Break	
11.00 - 11.45	Synthesis – Linking solidification phenomena	A. Phillion
11.45	Concluding remarks	M. Gremaud
12.00	End	
12.15	Lunch	

PRACTICAL INFORMATION

- Dates:** from Sunday March 26, 2023 evening
to Friday March 31, 2023, mid-day (lunch included)
- Location:** Hotel "Eurotel Victoria", Les Diablerets, Switzerland
(Mountain resort in the Swiss Alps, 100 km from Geneva)
www.eurotel-victoria.ch
- Access:** Train or car (2.5 hours by train from Geneva Airport and
4.5 hours by train from Zurich Airport).
- Registration:** As soon as possible at
solidification.course@esi-group.com
- Registration is limited to 40 participants.
All registrations will be confirmed in writing within 2-3 weeks.
- Price:** EUR 4'850.-
This price includes the registration fee, the booklet of the course
with the lecture notes, the book "Solidification", the hotel (full
board), drinks during the meals, social hours and coffee breaks.
- Payment** The course fee should be paid before February 1st, 2023.
Instructions for payment will be provided after registration.

An information package with the practical details will be sent in around mid-January 2023 to each registered participant.

Previous courses were attended by participants from the following companies or institutions:

Argentina INTI **Australia** BHP, Comalco, Uni Wollongong **Austria** AMAG, ARC, Böhler, Buntmetall Amstetten, Eisenwerk Sulzau Werfen, Giesserei Institut, Hertwich Eng., Leoben University, LKR, Mubea Wheels, Siemens, Voest-Alpine, TU Graz **Belgium** Allard Europe, Bekaert, Consolidated Precision Products, CRIF, Heraeus Electro-Nite Intl., KU Leuven, Magotteaux, Union Minière **Brazil** Electro Aço Altona, Gerdau, ITP, Villares Metals **Canada** Alcan, Aluminium Tech. Carlton Univ., Magotteaux, Univ. of McMaster, Univ. of Windsor, Univ. of Western Ontario **Czech Rep.** Mecas, Vitkovice Heavy Machinery, Technical Univ. Ostrava **Denmark** Jydske, Univ. of Denmark **Finland** Outokumpu, VTT **France** ABS Centre Métallurgique, Airbus Helicopters, Alcoa Howmet, Aperam Isbergues, Arts et Métiers Angers, ArcelorMittal, Asco Metal Creas, Aubert&Duval, Cabinet Braun, Castmetal, CEA, Cemef, Cezus, Cirimat, CLAL, Clecim, Constellium, Creusot-Loire Industrie, CTIF, Ecole Centrale de Nantes, Ecole des Mines Albi, Ecole des Mines St-Etienne, Electricité de France, ENSAM, ESI Group, Fives Cryo, Fonderie Nouvelle Jouve, Forcast, Framatome, Griset, Howmet, Imphy, Industeel, INPG, INPT, Institut Jean Lamour, IRSN, Le Bélier, Lorraine University, Manoir Industries, Manoir St Brieuc, Metafensch, Montupet, PCC France, Péchiney, Pont-à-Mousson, Renault, Rio Tinto Alcan, Safran, Saint-Gobain Cree, Sambre et Meuse, SCC, Sepr, Safran, Snecma, Techpy, Trefimetaux, Turbine Casting, ThyssenKruppElectrical Steel, Ugine, Ugitech, Umicore, Unimetal, Univ. de Lorraine, Vallourec, Waeles, Wamar **Germany** Access, Airbus, Aleris, Aluminiumfeinguss Soest, Aurubis, Buderus Edelstahl, Daimler Chrysler, DLR, Doncasters, Fraunhofer, GKSS, Helmholtz Zentrum, Hydro, KME, MAN, MKM, MTU, Otto Fuchs, Ritter Al, Salzgitter Mannesmann, Reiner Brach, Siempelkamp, Schmidt & Clemens, SMS Diemag, SMS Group, Thyssen, Tital, Trimet Al, TU Dresden, TU Freiberg, VAW, Zollern **Greece** Alcor, Egnatia foundry, Elkeme, Elval **Hungary** Miskolc University **India** Anant, Concast, ESI India, GM, HAL, Jadavpur University, Kalyani Carpenter, Peekay Steel, Simplex Castings, Sri Ranganathar Valves **Ireland** DePuy, Dublin Inst. Of Tech., Materials Ireland, Montupet **Israel** NRCN, Urdan **Italy** Area3, Brembo, Centro Ricerche FAR, Fiat, Centro Sviluppo Materiali, Danieli, ECOTRE, EMA, Europa Microfusionei Aerospaziali, Fonderia Atti, Maxion Wheels, Metra, Microfusione Stellite, Politecnico di Torino, Refel, Teksid, Univ. of Bologna, Univ. of Brescia, Zanardi Fonderie **Japan** IHI, JIPS, Kyushu University, Mitsubishi Heavy Industries, Nihon ESI, Nippon Steel, Tokyo University **Korea** Hyundai Heavy Ind., Inst.
